and general conditions which follow.

ROBERT K. MCCORMICK, Regional Manager
Department of Ecology (M)

USEPA SF

1261102

AGC2H000513

S2. MONITORING (Continued)

c. Recording of Results

For each measurement or sample taken, the permittee shall record the following information: (1) the date, exact place, and time of sampling; (2) the dates the analyses were performed; (3) who performed the analyses; (4) the analytical techniques or methods used; and (5) the results of all analyses.

S3. SOLID WASTE DISPOSAL

- a. The permittee shall handle and dispose of all solid waste material in such a manner as to prevent its entry into state ground or surface waters.

S4. OPERATION AND MAINTENANCE

The pier shall be maintained to minimize spillage from loading and off loading operations.

- a. Materials spilled on the loading pier shall be swept or otherwise removed from the area to prevent their entry to state surface waters.
- b. Hydraulic cleaning of this area shall not be permitted unless materials are of a nature that endanger property or human life.

- c. To inspect at reasonable times any monitoring equipment or method required in the permit;
 - d. To inspect at reasonable times any collection, treatment, pollution management, or discharge facilities required under the permit;
 - e. To sample at reasonable times any discharge of pollutants.
- G7. The permittee shall apply for a new permit at least sixty days prior to the time when facility expansions, production changes, or process modifications will (1) result in new or substantially increased discharges of waste characteristics or volume or a change in the nature of the discharge of pollutants, or (2) violate the terms and conditions of the existing permit.
- G8. A permit shall be subject to termination upon thirty days notice in writing if the department finds:
- a. That it was procured by misrepresentation of any material fact or by lack of full disclosure in the application;
 - b. That there has been a violation of the conditions thereof;
 - c. That a material change in quantity and type of waste disposal exists.

In the event that a material change in the conditions of the state waters Utilized creates a dangerous degree of pollution, the department may specify additional conditions in the permits previously issued.

The director of the department is authorized to issue permits for waste disposal and specify the conditions and expiration date of such permits.

Permit modification, revocation and reissuance, or termination may be initiated by the department or requested by any interested person.

- G9. A permittee who knows or has reason to believe that any activity has occurred or will occur which would constitute cause for modification or revocation and reissuance under Condition G8. must report its plans, or such information, to the department so that a decision can be made on whether action to modify or revoke and reissue a permit will be required. The department may then require submission of a new application. Submission of such application does not relieve the discharger of the duty to comply with the existing permit until it is modified or reissued.
- G10. Prior to constructing or modifying any wastewater control facilities, detailed plans shall be submitted to the department for approval in accordance with WAC 173-240. Facilities shall be constructed and operated in accordance with the approved plans.
- G11. Nothing in this permit shall be construed as excusing the permittee from compliance with any applicable federal, state, or local statutes, ordinances, or regulations.
